Dear Hiring Manager,

I hope you are doing well.

I am writing to apply for a Web Internship at [Company Name]. I got the information from the ERO team at Passerelles Numériques Cambodia (PNC) that your company is looking for a Web Intern. I am currently a second-year student at PNC, majoring in Web Development. I am excited about this opportunity to gain real working experience and to learn from your professional team.

During my studies, I have developed a strong foundation in HTML, CSS, JavaScript, TypeScript (OOP), PHP (Laravel), Vue.js, and MySQL, with basic knowledge of Node.js and RESTful APIs. I have completed several practical projects, including a Football Field Booking System, Note Taker app, Break Time Alarm, and deployment projects using AWS EC2 and modern frameworks. These experiences helped me build skills in responsive web development, database management, deployment, and version control with Git.

In addition to technical experience, I have developed strong communication, teamwork, time management, and attention to detail skills. I always try to contribute positively to team efforts and complete tasks responsibly.

With my experience and educational background, I strongly believe that I am a good fit for this position at [Company Name]. I would be honored to have the opportunity to learn from your experienced IT team and support your projects. Thank you very much for taking the time to consider my application. I would be happy to provide more information or attend an interview at your convenience.

Best regards,

Pon Makara
